[1:0] BRAKES PARTS**[1:1] "COMPETIZIONE" brake discs for gr.N and performance cars.**

The Advanced Innovation Technology "COMPETIZIONE" brake discs are both balancing intern of the outside diameter and the inside of the discs to give the better performance. These discs has high temperature heat treatment no drills no grooved. They're produced to replace the standard O.E. brake rotors.(Group "N" specs.). Are made to be used with High Performance Brake Pads like ferodo Racing, Pagid, Carbon Metal.

We do have a special production of brake pads for fast road applications also . These discs are drilled & grooved, Please visit the on-line Catalogue to http://www.tecno2.com/webroot/downloads/catalogo_dischi_freno_2009_.xls

[2.0] DRIVE CLUTCH DISCS AND ASSEMBLY COVERS

[2:1] ADVANCED INNOVATION TECHNOLOGY

ADVANCED INNOVATION TECHNOLOGY is a TECNO 2 trade name. Clutches are manufactured to a TECNO 2 design to meet the demands of the driver who does not require an ultimate specification or expence of full competition components A.I.TECH. drive discs & covers are ideal for private entrants in national rally & race applications. Sprung clutch discs for fast road use, solid clutch discs for competition.

[4:0] COMPONENTS**[4:1] LIGHT wheel spacers**

The wheel spacer "LIGHT", machined from castings, are ideal for road application & are also very cost effective with multiple application ability (4&5 holes). "Competition" spacers are produced on the same digital machinery but from higher grade aluminium bar for individual models. These spacers are anodised to prevent oxydation. Priced in axle sets of 2 pieces. For ease of fittment we may supply a full range of bolts or studs & nuts of [4:2].

[4:2] NUTS STUDS and BOLTS for wheels

Wheel studs & bolts are produced from high tensile steel having rolled threads, reducing the risk of fatigue failures. Knowledge from our competition experience has led us to use a dissimilar material of the nut from that of the wheel stud. This plus copper coating of the nut assures security

[5:0] SPECIAL ENGINE PARTS

[5:1] A.I.Tech. Special head bolts

A.I.Tech. special cylinder head bolts are a direct replacement for the standard bolts. These bolts are made from very high tensile steel blanks. Basic machining is carried out prior to heat treating and then finally the finishing process cleans up the thread profile. These bolts help to protect the head gasket integrity in uprated engines. Special group A & WRC cyl head bolts are available on demand.

[5:5] ADVANCED INNOVATION TECHNOLOGY Silicone hoses

Advanced Innovation Technology has now his own silicone hoses production.

These hoses are designed for continuous use in heating and coolant system at temperatures from -60°C+170°C.

The burst pressure range is between 5,6 and 12,7 bars. The recommended working pressure from 2,1 to 4,2 bar (the pressure dependent on shape and size). Finishing colours is shining blue. The straight lengths are of 1 mtr with inside diameter ranging from 6mm to 127mm. Advanced Innovation Technology manufacture include elbow of any angle, reduces, multiple bend, convoluted and corrugated or spiral reinforced hoses: quotations on demand.

[5:6] A.I.TECH FORGED PISTONS

forget the imitators and low price, low quality imposters. A.I.TECH is the finest forged piston made for your Street or Race engine...Normally aspirated, Turbo, Supercharged, NOS..You name it and Top-End and A.I.TECH can supply you a piston to fit your needs. Can supply you with pistons for any Import engine at the best possible price. We will not be undersold on any shelf stock piston from A.I.TECH. In addition to the shelf stock pistons that A.I.TECH offers we can custom make you a piston for almost any application..Big bores, Turbo or NOS, Stokers, whatever you want, we can probably make it.

Special forged piston are supplied with pin and rings:
